Dear Sir/Madam,

**PROPOSED BASE STATION UPGRADE AT WICKHAM CELLNET MAST, HOADS HILL WATER TOWER,
NEAR WICKHAM, HAMPSHIRE, PO17 5BU (NGRs: E 457826 / N 110240)**

Cornerstone is the UK's leading mobile infrastructure services company. We acquire, manage, and own over 20,000 sites and are committed to enabling best in class mobile connectivity for over half of all the country's mobile customers. We oversee works on behalf of telecommunications providers and wherever possible aim to:

- promote shared infrastructure
- maximise opportunities to consolidate the number of base stations
- significantly reduce the environmental impact of network development

Cornerstone are in the process of progressing suitable sites in the Wickham area for radio base stations that will improve service provision for Vodafone Limited. The purpose of this letter is to consult with you and seek your views on our proposal before proceeding with the works. We understand that you are not always able to provide site specific comments, however, Cornerstone and Vodafone Limited are committed to consultation with communities for mobile telecommunications proposals and as such would encourage you to respond.

As part of the operator's network improvement program, there is a specific requirement for a radio base station upgrade at this location to replace existing equipment with the latest technologies, which will improve existing coverage provisions for better signal strength, capacity and speed.

Mobiles can only work with a network of base stations in place where people want to use their mobile phones or other wireless devices. Without base stations, the mobile phones, and other devices we rely on simply won't work.

In the first instance, all correspondence should be directed to the agent.

Please find below the details of the proposed site and the alternative site options considered and discounted in our site selection process: -

A number of options have been assessed in respect of the site search process and we consider the best solution is as follows:

CS 12388028 (Cornerstone, Vodafone Limited) Wickham Cellnet Mast

Description of Development: Removal of 6no existing antennas to be replaced with 3no new antennas and other associated ancillary works thereto.

This option has been selected following the operator's sequential approach to site selection whereby existing base stations have been reviewed in the first instance to explore upgrade opportunities that can improve coverage provisions to cater for current and future demands, prior to the exploration of alternative locations for new installations. As the proposed works involve the upgrade of an existing base station, it was therefore not necessary to identify alternative site options in accordance with the Code of Best Practice for telecommunications development as well as national and local planning policy.

As a licensed code operator, a minimalistic approach to design is adopted in every instance to ensure that the least impactful scheme is pursued to ensure the site's overall visual appearance is kept to a technical minimum whilst ensuring the technical objectives of the works remain achievable. Within the technical parameters of each site's requirements, the operator seeks to maintain the minimum level of equipment and scale of works as far as practicable.

The proposed works are minor and will be capable of assimilating into the surrounding environment. In this instance an existing mast will be utilised and the proposed antennas will accommodate existing antenna locations at the top of the mast, which will retain the existing visual appearance of the site. The proposed antennas and ancillary equipment are small in scale, which will assimilate onto the tower with minimal visual impact.

Within the context of the immediate surroundings the extent of proposed changes would be nominally felt, thus preserving the existing character and setting of the surrounding area.

In accordance with planning legislation, the proposed scheme constitutes permitted development and does not require a prior approval/planning application to be submitted to the local planning authority however, a notification letter has been issued to inform them of the operator's intention to utilise permitted development rights for these works.

The Local Planning Authority mast register and our records of other potential sites have already been reviewed, the policies in the Development Plan have been taken into account and the planning history of the site has been examined.

In the first instance, all correspondence should be directed to the agent.

Hi Jane

Thanks for picking this up.

There are three energy developments going through at the moment:

1) Conrad Energy (Developments) II Limited 49.9MW Solar Farm**Case No:** 24/02804/FUL**Location:** Land At Titchfield Lane Wickham Hampshire (ACROSS TEN SITES/FIELDS)**Proposal:** Installation, operation and decommissioning of renewable energy generating station comprising ground-mounted photovoltaic solar arrays together with transformer stations, site accesses, internal access tracks, security measures, access gates, other ancillary infrastructure, landscaping and biodiversity enhancements**2) Grenergy 50MW BESS****Case No:** 24/02818/FUL**Proposal:** Erection of Battery Energy Storage Facility including creation of new vehicular access along with landscaping and all associated engineering works**Location:** Land Adjacent Titchfield Lane Wickham Hampshire**3) Navigate Corporation (SLR) 10.5MW Solar Farm****Case No:** 24/02023/HCS**Location:** Land Off, Titchfield Lane, Wickham, Hampshire PO15 6DY**Proposal:** Proposed revised landform modifications to enable the construction of a 10.5 MW Solar Photovoltaic PV_Farm and Gas Management System with associated works at the Funtley Refuse Tip

Then there is is the Hampshire Water Transfer and Water Recycling Project, which runs down Titchfield Lane:

We are currently in communication with a landowner who owns land where the waterpipe is going through and he is looking support to develop the site with housing or solar panels once the pipe work has been done.

Its probably also worth flagging the number of outstanding enforcement cases the the Titchfield Lane area as well, as they are impacting the use of the lane also. They are as follows:

Parish Name	Reference No	Priority	Date Received	Address	Nature of Complaint
Wickham And Knowle	1800113/CARAVANS	3	06/04/2018	Land South Of Moorshill Farmley Road Titchfield Hampshire	Alleged unauthorised occupied mobile home on site.

Wickham And Knowle	2400312/WKS	3	28/10/2024	Planes Construction Limited Farmley Road Titchfield Hampshire	Alleged unauthorised building for Health and Fitness Gym

We have just submitted an objection to the Conrad energy application and that might help understand the Councils concerns about the over development.

Best wishes
Tracey

Dear Tracey

Julie has asked Lorna Hutchings (Service Lead- Built Environment) and me to be your contacts on this matter. One of us will be in touch shortly to discuss the best way for the Parish Council to talk us through their concerns. Meanwhile it would be helpful to have any additional information you may be able to provide about specific concerns or applications.

Kind regards

Hi Julie

Wickham and Knowle Parish Council would like to have a meeting with Winchester about concerns over the numerous planning applications coming forward for Titchfield Lane in Wickham due to the sub station at Botley Woods.

Appreciate you are busy with the Local Plan, but we would appreciate a catch up with someone on the team if that's possible? Happy to include District Councillors.

Best wishes

Tracey

As discussed at our meeting on the 16th January when we discussed damage to my garage roof caused by stray golf balls, I have recently found a further ball in my garden and this weekend one in the gutter of my conservatory. I pointed out that this is not only an ongoing problem for damage to my property but also the very real danger of a person getting hit by one whilst using my garden.

As these golf balls are coming from persons using your property, your company has a duty of care to myself and my family.

At our meeting we discussed the erection of nets to take away this problem or to re figure your golf course. Could you please advise me as to progress.
